ABOUT INTELLECT SEEC

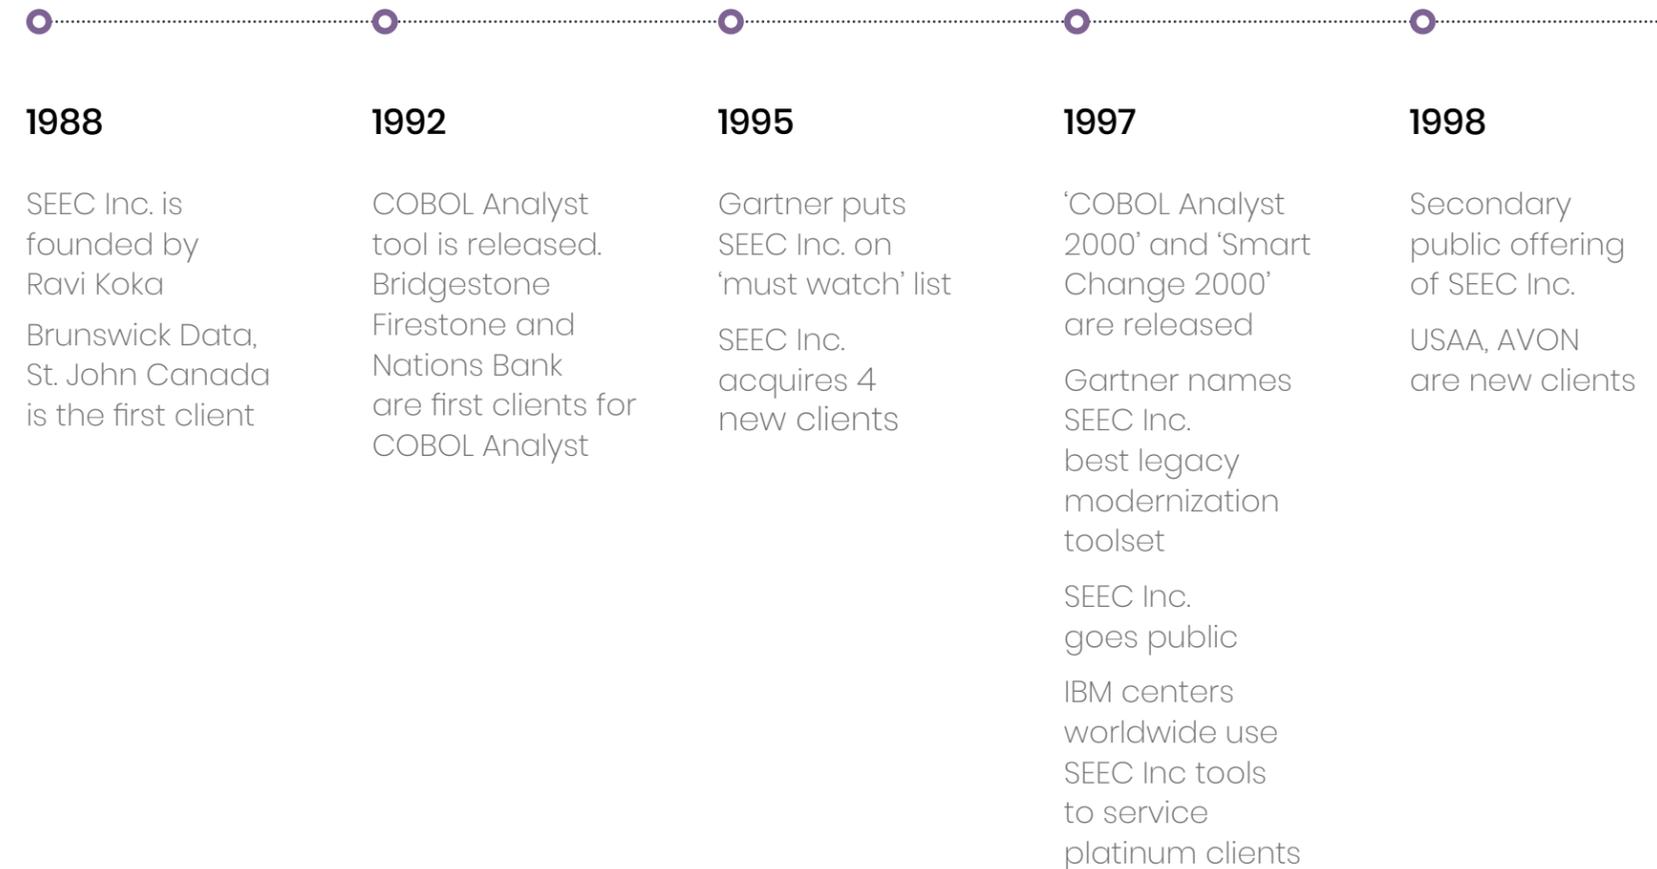

Intellect SEEC leverages next generation technologies to solve complex insurance problems and create intelligent solutions that deliver results.

We have been working with insurers across the globe for over 20 years, delivering value through core systems. However, we still consider ourselves as challengers. We work with established industry players and game changers alike to achieve a confluence of purpose and capabilities that questions the status quo and delivers exponential results to our network of stakeholders. Insurance is complex, but our solutions leverage big data, AI and conversational technologies to make it intuitive, engaging and insightful.

We have the vision of working with our clients and partners to deliver intelligent software that redefines insurance with speed, simplicity and sheer grit.

MAIN ACHIEVEMENTS

StarStone named Celent model insurer of the year 2017

StarStone, the global specialty insurer was named the Model Insurer of 2017 by industry analyst, Celent in the Data Mastery and Analytics category. Celent recognized the insurer's exponential leap in using AI through the Intellect Risk Analyst platform to materially reduce loss ratios and improve profitability across key portfolios.

AWS and Intellect SEEC – a winning partnership

In 2017, AWS profiled Intellect SEEC as a standard bearer of cloud products and solutions in insurance. We provide easily available cloud-based applications at low cost to our customers. Even small to mid-sized insurers who have previously not had the same level of enterprise IT infrastructure as larger companies can now access advanced technology as a service.

Using Amazon Web Services, we have been able to reduce IT costs by 60% and IT management time by 85% for our clients.

Intellect SEEC sets a new benchmark in insurance digital transformation

In less than 9 months, we enabled one of the world's largest insurers to go live with their full-scale digital transformation project.

LEADERSHIP

Pranav Pasricha
Chief Executive Officer

Pranav is the CEO of Intellect SEEC and a pioneer in deploying AI and big data in the insurance industry. As a reformed industry executive, his mission is to bring insurance out of the 1800s and into the 21st century. Pranav is a widely recognized thought leader, having published articles on insurtech in leading publications. He is also a well-known speaker at industry events. Before joining Intellect SEEC, he was in charge of running strategy, technology and operations for QBE Insurance, Australia.

Lakshan DeSilva
Chief Technology Officer

As CTO at Intellect SEEC, Lakshan draws from his experience in technology, venture capital, insurance and wealth management. With a focus on AI and blockchain, he helps customers and partners reach their exponential potential.

Laila Beane
Chief Customer Officer and
Head of Consulting

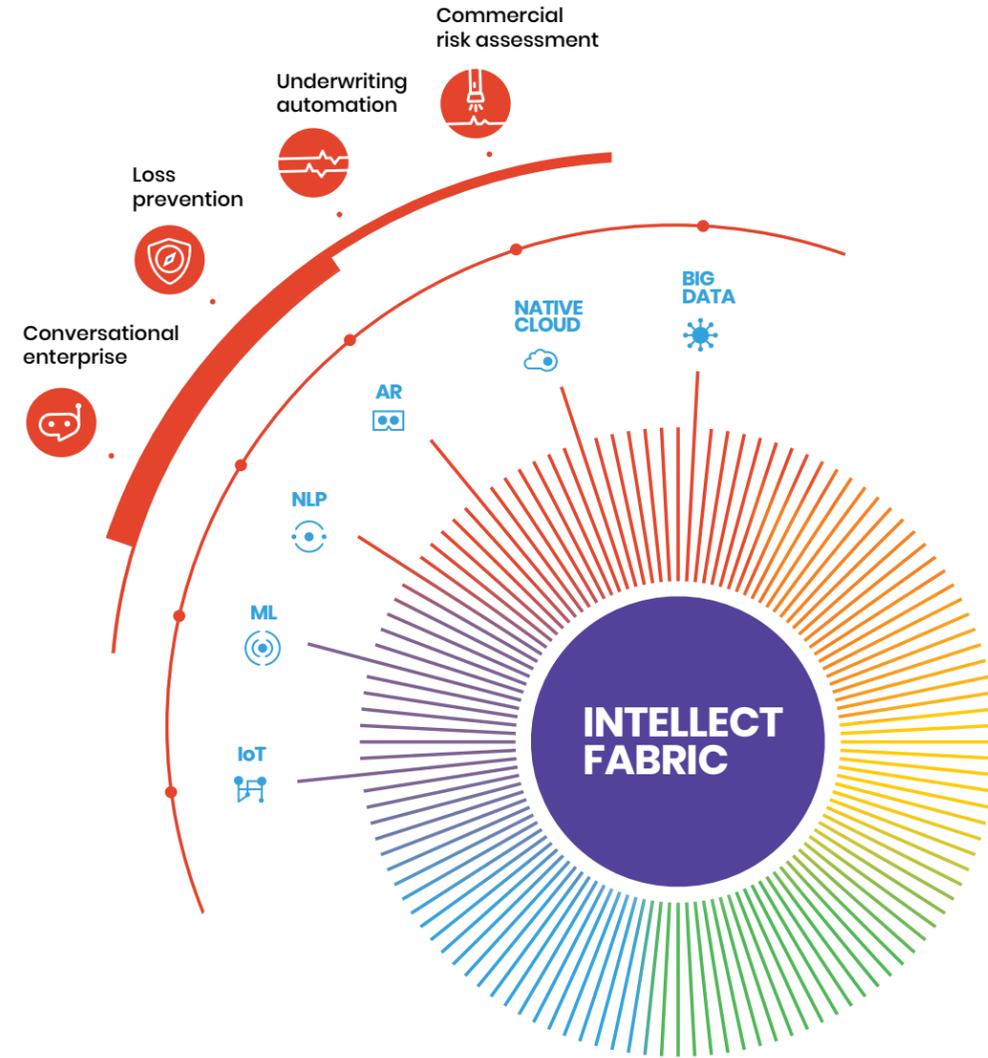

Laila is an insurtech evangelist and a highly accomplished leader with 20+ years of experience. She has held various leadership positions in the manufacturing and insurance sectors including Motorola, ACORD and Allstate. Laila has successfully led multimillion-

dollar digital transformation strategies. She has been a speaker and panelist at numerous insurance industry events, and her articles have been published in several industry publications. She graduated from University of Illinois with her Master's Degree in Computer Science.

OUR PLATFORM

Intellect Fabric, our cloud-native, machine learning based insurtech platform is proven on a global scale. We have created award-winning solutions using the platform while ensuring cost-effectiveness, high-performance and security.

Cloud-native over in-premise

We run a single runtime production codebase across every client across the globe.

Agility over fitment

Fitment is a nebulous term from enterprise tech. It is a measure of slow-moving and outdated enterprise software. We meet client demands asking how quickly we can bridge the gaps and ensure it is configuration and not build.

Configuration over build

Update to user interface, rules and workflow has to be instantaneous with zero downtime, yet governed with the ability to be rolled back. Being truly cloud-native means we only have the option of configuration.

OUR PRODUCTS

Xponent Underwriting automation

Intellect Xponent is an AI-based automated underwriting solution designed for commercial insurance. It is proven to not just automate processes and bring cost efficiency, but also improve quality of decision-making through AI and big data, and have tangible loss ratio impact.

The product provides underwriters, experts and brokers the necessary information to properly assess risk. Xponent has three portals that enable underwriters, producers and experts to build complete risk profiles, obtain a 360-degree view of their accounts, deliver faster service to brokers, integrate with third-parties and enable collaboration.

Risk Analyst Commercial risk assessment

Intellect Risk Analyst is the most advanced underwriting risk assessment tool in the industry. It is designed to give underwriters a holistic understanding across all dimensions that really matter in commercial insurance. Besides covering past history and facts relevant to a case, the tool provides leading indicators of potentially adverse events in the future. The end result is a better-informed, complete and detailed assessment of risk that delivers dramatic improvement to the underwriting loss ratio.

It applies highly advanced artificial intelligence, machine learning and line-of-business-specific underwriting rules and risk predictors to thousands of data sources. The result is a highly intuitive and interactive dashboard that summarizes everything an underwriter, analyst, actuary or an agent needs to know about a risk within minutes.

Botworks Intelligent bot-building platform

Intellect Botworks is a unified platform for building and rapidly deploying AI-based bots across the enterprise—both conversational for human

engagement as well as process bots. Botworks helps insurers leverage a common domain training set for all their enterprise needs and also utilizes a common set of internal and external data connectors for a rich contextual experience. It contains a common set of microservices for transaction enablement with the core systems, saving large carriers significant time and money in their engagement and automation journey.

PRESS RELEASES

AmeriTrust selects Xponent underwriting workstation from Intellect SEEC for underwriting transformation

AmeriTrust joins a growing group of carriers who are moving away from core replacement projects in favor of modern technology (big data, AI, and cloud-based) solutions.

Intellect SEEC wins seven clients in seven months for its new platform

Intellect SEEC, the insurance software division of Intellect Design Arena, won seven new clients in the first seven months of its fiscal year for its new cloud-native platform. The platform, which supports both life and property and casualty carriers, has 10 different applications across distribution and underwriting. Five of these new client wins were in the United States and the others were in Canada and Europe.

Intellect Risk Analyst bags the prestigious SMA Innovation In Action Award

Intellect SEEC, the insurance software division of Intellect Design Arena, has earned the prestigious 2017 SMA Innovation in Action Award for implementation of its product Intellect Risk Analyst. The SMA Innovation in Action Awards are presented annually during the SMA Summit to celebrate innovation in the insurance industry.
