

The least favorite part of your job now takes the least amount of time.

Context Business Experience - Insurance: (Claims) reduces claims processing time by 75%

How seamless is your claims experience? As products evolve, your claimant and beneficiary's experience with the claims process dictates your future relationship with them. We understand the complexity, touch points and the nuances of claims processing. Context Business Experience - Insurance: (Claims) takes all of the elements that make claims processing so complex and brings them together in an intuitive environment.
