

End-to-end commercial underwriting transformation powered by artificial intelligence

For mid-market and large commercial insurance carriers

Magic Submission

Cognitive and purpose built ingestion to identify knock outs and quick declines, early in the submission process. Information validation and enrichment through deep learning models and third party sources, ensures highest accuracy of risk information for underwriting. Automatic reverse engineering of location level NAICS and ISO from broker descriptions with the highest accuracy in the industry along with simple exception handling user interface places this product at the forefront among others.

Xponent

An AI powered, account centric underwriter workbench built to ensure accuracy of underwriting decisions for portfolio profitability. Along with cognitive ingestion, it provides deep risk insights triangulated from hundreds of external sources, captures underwriters 'thought processes' and enables real time collaboration across respective parties involved.

Risk Analyst

A UI and API based data solution that contextually searches, aggregates and triangulates risk data from hundreds of structured and unstructured sources to provide deep risk insights with risk scores and grades at an account, location and person level. Proprietary algorithms are trained

to find the 'element of truth' across varied sources to ensure the highest underwriting accuracy and enables pre-fill with visual alerts to focus the underwriter's time on high value tasks. Data transparency provides the underwriter with information of the underlying sources.

Intellect offers a wide scope of certified technologists and domain experts to accelerate your modernization initiatives. These include technologies such as Salesforce and Mulesoft that are used in modern insurtech.
