

Uncover 10x more insights on your underwriting data

For mid-market and large commercial insurance carriers

Overview

Intellect Risk Analyst is an AI and ML based solution that enriches structured and unstructured data to help commercial insurance companies unearth 360° intel on any entity.

It provides comprehensive risk insights from both structured and unstructured incoming data. It is a 'machine-learning' (ML) based risk management solution that has been purpose-built for commercial insurance.

Risk Analyst has the potential to transform your underwriting with efficiencies as high as 70%, resulting in potential COR reduction of anywhere between 2-4%.

At Intellect, we have the most accurate data. With Intellect's custom AI models, triangulation algorithms, and data sources we have the most accurate data in the market.

In 5 steps, RA empowers you with relevant data to make the best decision

Unstructured data sources

Reddit, Glassdoor, Yelp, Quora, Wikipedia, Facebook, LinkedIn, Angie's List, Time Out and thousands more.

Third-party / structured data sources

Better Business Bureau, trusted and prominent financial sources, industry-wide accepted and used property sources, Google Places and many more.

Internal / structured data sources

Billing, Policy, Claims, Data Warehouse

Key features of Intellect Risk Analyst that provides 10x more insights

Risk Analyst ensures maximum data accuracy and reliability in enriching both structured and unstructured incoming data through triangulation from multiple sources and converting it into actionable facts with insights.

Company Analysis

Gain valuable insights and alerts about your submission data from both internal and external sources including financial and operations, competitors, legal filings, industry and associations. All through preexisting APIs.

Insured Item Analysis

Find relevant risk details about properties and businesses across various business lines like Workers Compensation, Commercial Auto, Commercial Property, General Liability and BOP and get relevant custom alerts for a given location.

People Analysis

Gather social intelligence using big data; get a comprehensive picture of a person's profile and relevant alerts based on analysis of key people associated.

Benefits experienced by our customers

60% reduction in time to underwriter decisions

Less than one-week to 'roll out' new data connectors

Scalable to any data source and any data type

Few hours to less than three days to roll out dynamic data packages

27% enrichment of risk data accuracy and footprint of broker submissions

Predictive models to determine key predictors of premium/loss

Learn how StarStone Insurance reduced underwriting decision-making time by 70%
